NiceBank

NICEBANK DISPUTE ASSISTANT

Card disputes solved in a minute, not in 15 days

An AI assistant that finds the exact charge, explains it or opens the dispute, and hands specialists only the cases that need them.

Spanish & Portuguese · Mexico · Colombia · Argentina

Factored AI & Data Hackathon 2026

NiceBank

"I don't recognize this charge": a 15-day wait

Today, for María

Day 1

Sees a strange charge and calls the bank, worried.

Day 2–10

Explains it again to a second person; nobody can find it.

Day 15

Gets an answer, if her case did not miss the deadline.

40%

of all complaints are card-charge disputes

~15 days

to resolve each one

75%

of those complaints are still open

3.1 / 5

customer satisfaction

Source: organizer dataset, 27,133 dispute complaints in three years.

NiceBank

María writes it the way she'd say it

No reconozco un cobro de 385,71 de hoy

Encontré el cargo de 385,71 USD en Streaming Music del 17 de junio con tu tarjeta terminada en 2457. ¿Confirmas que abra una disputa por "Cargo no reconocido"?

✓ Confirmar

Listo: abrí la disputa DSP-001048 por el cargo de 385,71 USD en Streaming Music. Verifiqué que el caso quedó registrado.

Real conversation from our demo (the product speaks Spanish and Portuguese)

Three outcomes, about a minute

Dispute opened and verified

Found in her own history and confirmed before anything is done.

Explained, no dispute needed

8% of card purchases are pending, declined or already reversed: it says so with the real movement.

A specialist with the full case

High amounts, old charges or a stolen card go to a person, with nothing left to ask.

NiceBank

Value for the bank, proven

< 1 min

from first message to a verified dispute, instead of ~15 days

82%

of routine disputes resolved automatically and correctly

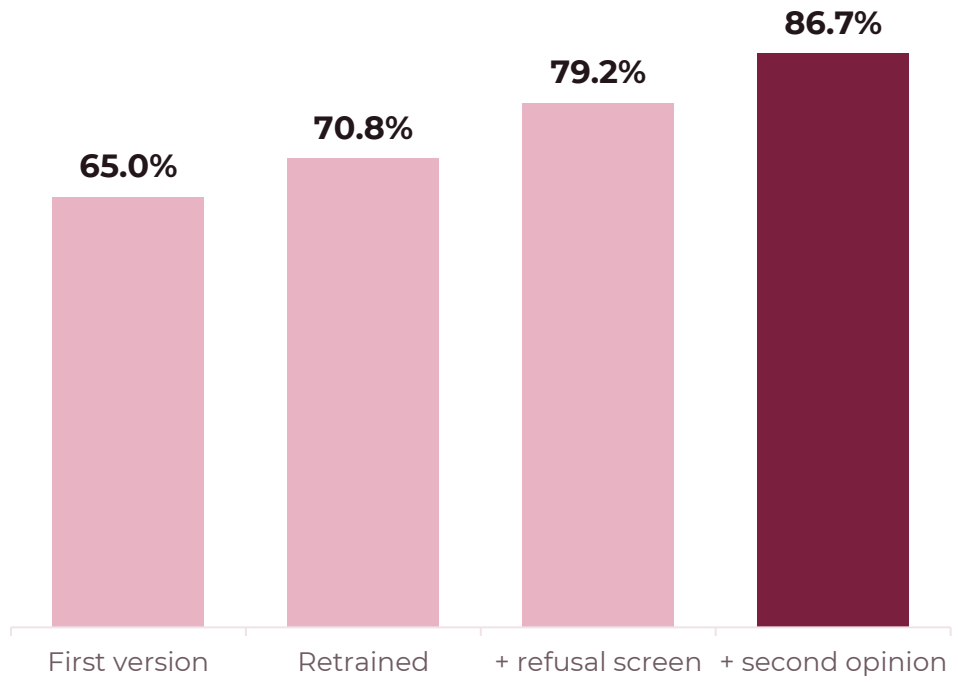

43% fewer

cases sent to a specialist than a rules-only process

0 / 120

unsafe outcomes: when unsure, it asks

Correct outcomes on 120 cases it had never seen

Specialists receive prioritized cases with verified facts and evidence: they decide, they don't re-ask.

NiceBank

How it's built, and why

Message
Spanish or Portuguese, as the customer says it

Protect
Mask personal data, refuse abuse

Understand
Classifier + LLM: acts only if both agree

Decide
Written policy: deadlines and limits

Act or hand off
Customer confirms; or a specialist gets the case

Autonomy

Acts only after the customer confirms. Never moves money. High amounts go to a person.

Accuracy

Two models must agree on the type: 86.7% correct on unseen cases, 0 unsafe.

Latency & cost

About 1 s per reply, the LLM runs in parallel. US$0.0001 per conversation.

Human oversight

Specialist console with full audit trail; identity shown only when a case is claimed.

Privacy & fairness

The LLM only sees masked text. No decision uses country or segment.

NEXT STEP

NiceBank

Ready for a pilot

1 Shadow mode

The assistant reads real, consented messages and proposes; specialists compare. No customer impact.

2 Pilot

One country and a share of customers, with daily quality and safety reports.

3 Scale

More countries and channels such as WhatsApp, with the same rules and audit trail.

Built on the organizer's synthetic data; the pilot is where real customer language confirms these results.

When it is not sure, it asks. When a person is needed, the person gets everything.
